

GLOBAL CLAIMS FILING SERVICES

BFA handles the entire claims filing process: from assessing eligibility and preparing and filing the claim forms, to verifying the accuracy of check amounts. Claims filing is not a passive process; BFA timely resolves all deficiencies and audit requests ensuring that claims are accepted by the administrators.

FULL SERVICE FOR A LOW FEE

Low and transparent pricing with a cap.

Attorney-driven process maximizes monetary recovery of investment losses through the filing of claim forms.

Full service securities portfolio monitoring: monitor trading history, identify recoverable losses, file claim forms, and obtain a recovery from securities class actions and other investment-related settlements.

SETTLEMENT FUNDS AVAILABLE

Billions of dollars in settlement funds are recovered each year on behalf of investors who have suffered losses.

Recovery requires investors to evaluate trading data and timely submit complete and accurate claim forms.

MEET THE TEAM

Law firms provide superior claim form filing services because claim form filing is inherently a legal process before the court. BFA regularly drafts claim forms and plans of allocation when we serve as lead counsel in securities class actions, and better understand the legal complexities. Each of the following team members is integral to the claims filing process.

Erin Woods, *Partner*, has over a decade of experience in securities litigation and the class action industry. Erin brings a unique blend of seasoned litigator, a decade of representation of institutional investors, and expertise in the claims administration process, including as a Director at one of the industry-leading claims administrators.

Kendra Schramm, *Of Counsel*, is dedicated to the Firm's Non-U.S. Litigation Practice, which includes advising clients on active participation in foreign shareholder actions and identifying settlement claims available to global investors.

Jack Ewashko, *Director of Client Reporting & Data*, has substantial experience in operations roles at banks, investment management firms, and at claims administration firms, providing the technical acumen needed to analyze our clients' trading data. Drawing on his experience of leading the administration of the largest complex financial instrument class action settlement at his prior firm, Jack ensures the accuracy of our settlement claims filings.

Christopher Capuozzo, *Associate Director, Client Data and Claims*, has over a decade of experience in the securities class action and claims filing fields, analyzing clients' exposure to financial fraud across the global marketplace. Chris is instrumental in the preparation of settlement claim filings.
