Case Studies

Sometimes It Takes a Crisis to Relearn the Lesson of Fixed Income

- The Global Financial Crisis and the Covid Pandemic highlighted the benefits that Fixed Income has to offer: income & diversification
- Fixed Income's low correlation with equities provides stability during times of volatility and anchors the asset allocation

Income Generator

Fixed Income securities provide regular income in the form of interest and principal payments

145% of Return over 10 Years	Cumulative	Annualized
-------------------------------------	-------------------	-------------------

Total Return 21.99% 2.01%

Coupon Return (with reinvestment) 31.94% 2.81%

104% of Return over 25 Years	Cumulative	Annualized
-------------------------------------	-------------------	-------------------

Total Return 152.38% 3.77%

Coupon Return (with reinvestment) 158.56% 3.87%

Attractive Long-Term Returns on the Horizon?

Future Long-Term Returns are Influenced by the Starting Level of Yield

Conclusion

- Investors should be wary of chasing higher yields without regard to the added volatility they are accepting as a result
- Investors may be injecting unnecessary downside risk and over-exposing their allocations to risk assets

“Takeaways”

- Income generation is a benefit, but not the primary reason to maintain Fixed Income as a core part of an asset allocation
- Fixed Income anchors the asset allocation by reducing risk, adding diversification, and providing regular income payments
